fang

Oxford Advanced Learners Dictionary 8th Ed.

fang [fang fangs] *BrE* [fæŋ] ^m *NAmE* [fæŋ] ^m **noun usually plural**

either of two long sharp teeth at the front of the mouths of some animals, such as a snake or dog

Word Origin:

late Old English (denoting 'booty' or 'spoils'), from Old Norse **fang** 'capture, grasp'. A sense 'trap, snare' is recorded from the mid 16th cent.; both this and the original sense survive in Scots. The current sense (also mid 16th cent.) reflects the same idea of 'something that catches and holds'.

Example Bank:

- The snake sank its fangs into its victim.
- The wolf growled and bared its sharp fangs.
